

INTERNET BASED NETWORK ATTACHED STORAGE

Features of Infolink's Off-Site/On-Line Data Storage

- Server connected via 100Mbps Connection to Infolink Multi-homed Internet POP
- 50GB Monthly Data Transfer Included
- IP Address Included
- Server Stored inside of locking Cabinet
- Server co-located in Infolink Secure Data Center
- Increased Data Capacity and Security.
- Available in 20GB, 40GB, 80GB, 160GB, 300GB, and higher storage increments.

Increased Data Capacity and Security

- Network attached file servers were developed as an alternative to the general-purpose server. They are single-purpose appliances, dedicated to serving files, providing a flexible and inexpensive alternative for adding storage to a workgroup. NAS servers most valuable function, is that they are connected directly to your network, serving as a valuable back-up resource in the event of catastrophe.

Data Co-Located in an Infolink Secure Data Center

- Data center features include, redundant power management grids, online UPS and backup generator power. Fortified construction consists of cement block, heavy load bearing floors, no windows and fortified ceilings and walls. FM 200 fire suppression system. Multiple computer room air-handling units (CRAHU) installed. Physical security is monitored and protected by video surveillance cameras, security personnel, and card key access control systems, monitored access, locked cabinets and cages.

Includes 50 GB of Internet Data Transfer

- Internet access is provided on Infolink's redundant Internet backbone architecture. The first 50GB of data transfer per month is included. Additional transfer bandwidth is available.

On-line/Offline Data Accessibility

- Backup of crucial data can be done daily or weekly without a major interruption in workflow. Data is accessible via Internet, Intranet or LAN/WAN connectivity. In the event of catastrophe, the unit is available to login via Internet.

Multi-platform File Sharing

- Supports Windows, Apple Macintosh, and UNIX/Linux

Provides Network Security Integration with NT Domain and Netware Bindery

- Integrates into your existing network security by supporting Windows domain controllers for pass-through security. Integration with Windows domain security for pass-through user authentication provides a superior solution over password security for network shares.

Optional Services

- Server Co-Location (details in separate brochure)
- Internet Bandwidth (details in separate brochure)
- Managed Firewall (details in separate brochure)
- Internet Bandwidth (details in separate brochure)
- Data Archival Service (details in separate brochure)
- Monitoring Services (details in separate brochure)
- Hands-On Support (contact your customer business manager)

Network Attached Storage Specifications

Network Transport Protocols

TCP/IP
IPX
NetBEUI
AppleTalk

Network File Protocols

Microsoft Networks (CIFS/SMB)
Novell NetWare (NCP)
UNIX (NFS)
Apple (AFP)
Internet (HTTP 1.0)
File Transport Protocol (FTP)

Network Security

Integrates with:
Microsoft NT Domain Controller
Novell NetWare Servers (Bindery)
Local Snap Server user list
User-, Share- and File-level Security

Network Client Types

Microsoft Windows 95/98/NT
4.0/2000/Me
Novell NetWare clients for Windows
SunOS & Solaris
SCO UNIX and OpenDesktop
Red Hat Linux
Macintosh System 7.5.5, 7.6, OS 8.x,
9.x

Server Emulation

Windows NT 4.0
NetWare 3.12

Appleshare 6.0
NFS 3.0

System Management

Web-Based Administration
SNMP MIB II
Disk Space Quotas
SMART Disk Failure Analysis

Setup and Configuration

Web-Based User Interface for System Administration.
Multilingual User Interface Supports English (US/UK),
French, German and Spanish

Client Data Backup

DataKeeper Snap Edition Software included for
Client Backup of Windows Files.
Multilingual User Interface Supports English (US/UK),
French, German and Spanish

Server Network Backup

Compatible with Windows and
NetWare Network Backup Software,
including Veritas Backup Exec,
Computer Associates, ARCserve

and MSFT Backup Software for Win 95/98/NT/2000/Me

Automatic IP Address Assignment

Supports DHCP, BOOTP and RARP

for auto assignment of IP address

Multiple File System Options

RAID 0 (disk striping): Available on 80GB or larger solutions.
RAID 1 (disk mirroring): Available on 80GB or larger solutions.
RAID 5 (disk striping with parity): Available on 160GB or larger
solutions.
Individual Independent Disks: Separate drives,
each seen as a separate volume (JBOD)

NETWORK ATTACHED STORAGE PRICELIST

Customer Server Purchased Solution

Size	Storage Server	Monthly Recurring Service Charge
20GB	\$499	\$199
40GB	\$799	\$199
80GB	\$1,399	\$199
160GB	\$2,699	\$199
300GB	\$4,499	\$199

Infolink Financed Solution

Size	Storage Server*	Monthly Recurring Service Charge
20GB	\$191	\$199
40GB	\$306	\$199
80GB	\$536	\$199
160GB	\$1,035	\$199
300GB	\$1,725	\$199

* Amount to be billed for the first three months of service only.

* \$7.00 additional charge will apply for each GB transferred over the 50GB allotment per month.
